I have been briefed and I understand the work	to be performed. I am fully aware of the safety prec	autions and agree to abi	de by these precautions.	
Accepted By:				
Section 4 - Standard Precautions (Check each item carefully)				
☐ Where installed, the Fire Sprinkler System is to be fully operable and in service.				
Those doing the work are trained and competent in the works covered by this Permit and in the use of fire fighting equipment and company emergency procedures.				
Only slow speed drilling/cutting methods (manual preferably) are to be used. Powered cutting or drilling is not to be permitted unless precautions to minimise hot cuttings and swarf (e.g. slow speed) are in place. These are to be outlined under Special Precautions below.				
<ul> <li>□ Welding or grinding or other hot work is not to be undertaken at any time on PFCM.</li> </ul>				
All tools and equipment are checked & in good condition. All blades and cutting surfaces must be properly sharpened and of correct material for task to be undertaken.				
☐ The work area is checked and is free of combustible and flammable materials.				
A Fire Extinguisher and/or Hose Reel is always available at the PFCM work area.				
☐ The Department Manager or Supervisor is notified of the intent to work. ☐ No exposed foam cores or easily ignited faces are left exposed at end of work day.				

Section 5 - Special Precautions (List an	y additional requirements necessary prior to	work commenceme	ent)
Section 6 - Final Inspection (Manager,	Supervisor, or Authorised Individual)		
	npletion of the work. All penetrations were found ttings, swarf and other waste have been removed.	to be sealed & no expos	ed foam core or
☐ All penetrations are sealed and no internal	core is left exposed.		
☐ Waste material has been removed and disp	oosed of safely outside the building.
